iOS Developer with 6+ years of experience building enterprise iOS applications, real-time communication systems, QA automation solutions, and CI/CD-driven release pipelines on AppStore and TestFlight at CIEC, contributing to applications serving 30+ million users.

SKILLS

- Swift
- Swift UI
- Firebase
- Google Analytics 4
- Combine Framework
- Websockets
- CI/CD with AppStoreConnect
- Apple Push Notification System
- Firebase Cloud Messaging
- JAVA
- Appium (Web Driver Agent)
- Cucumber

PROFESSIONAL EXPERIENCE

Engineer 3 - Software Development & Engineering

Comcast India Engineering Center, Chennai, India

10/2025 – Present | Chennai, India

- Engineered an end-to-end push notification workflow using APNs, FCM, and Remote Config, enabling real-time alerts across all application states with in-app notification history support.
- Built a real-time RF/network node monitoring iOS application featuring live spectrum visualization and WebSocket-driven communication workflows.

Engineer 2 - Product Development & Engineering

Comcast India Engineering Center, Chennai, India

04/2022 – 09/2025 | Chennai, India

- Developed a serial communication framework for the RCMP iOS application using the Redpark SDK, enabling reliable command execution and real-time device response handling over physical serial connectivity.
- Built a dynamic SwiftUI-based control bar for XMF iOS application that reactively renders and reorders contextual status indicators using Combine and WebSocket-driven workflows.
- Integrated Firebase Crashlytics and usage analytics across Yeti and XMF iOS applications, improving application monitoring and operational visibility.
- Designed and implemented a centralized Firebase Analytics tracking framework to standardize reusable screen-level analytics across multiple iOS applications.
- Led the UI modernization initiative for the RPHY Scanner iOS application by translating Figma designs into a consistent & modern visual experience.
- Completed end-to-end setup, firmware recovery, and network provisioning of XMF-H/ XMF-HD optical network meters by performing shell-based device recovery, firmware reflashing, LuCI network configuration, and Comcast bridge-mode connectivity enablement to achieve stable 24x7 operational availability.

EDUCATION

Master of Technology, Software Engineering

Birla Institute of Technology & Science, Pilani

08/2022 – 06/2024 | Pilani, India

Pursued M.Tech in Software Engineering at BITS Pilani, graduating with a CGPA of **7.65** and gaining deeper exposure to software engineering, system design, and machine learning concepts, while balancing full-time professional responsibilities at Comcast.

Bachelor of Technology, Computer Science

MEPCO Schlenk Engineering College, Sivakasi, India

07/2016 – 05/2020 | Sivakasi, India

Completed B.Tech. in Computer Science from Mepco Schlenk Engineering College, Sivakasi with a CGPA of **7.64**, developing strong fundamentals in software engineering, programming, algorithms, and computer science principles.

Higher Secondary Education

CEOA Matriculation Higher Secondary School

06/2015 – 03/2016 | Madurai, India

Completed Higher Secondary Education at CEOA Matriculation Higher Secondary School, Madurai with an aggregate score of **93.3%**, demonstrating strong academic performance and a solid foundation for pursuing engineering in Computer Science.

ORGANISATIONS

Comcast Cares Volunteer

02/2020 | Chennai, India

Contributed to classroom improvement activities at Government Higher Secondary School, Sholinganallur, Chennai including blackboard painting and basic infrastructure support.

Development Engineer 1

Comcast India Engineering Center, Chennai, India

07/2020 – 03/2022 | Chennai, India

- Developed a mobile automation framework using Appium, Java, Cucumber, and WebDriverAgent.
- Integrated Slack notifications into the CI/CD workflow for automated TestFlight release updates.

Internship Trainee

Comcast India Engineering Center, Chennai, India

01/2020 – 06/2020 | Chennai, India

Every engineer has a place that shapes their journey. Comcast was mine. It laid the foundation of my engineering career by instilling product ownership, proactive problem-solving, collaboration, and strong communication within enterprise-scale development environments.

- Started as an Internship Trainee, contributing to development and QA workflows while learning enterprise engineering practices through mentorship and cross-functional collaboration.
- Performed API testing and Web UI automation as part of application quality assurance and validation processes.

AWARDS

CHAMP Award

Comcast India Engineering Center

12/2023

Honoured for leading the strategic UI modernization of the RPHY Scanner iOS App.

CHAMP Award

Comcast India Engineering Center

11/2021

Recognized for architecting and delivering a robust end-to-end automation framework for the RPHY Scanner iOS App.

HIGH FIVE Award

Comcast India Engineering Center

06/2024

Awarded for enhancing user experience in the YETI application through proactive collaboration and solution design.

National Service Scheme

Volunteer

03/2017 – 04/2018 | Sivakasi, India

Mentored 6th and 7th grade students in Mathematics and English at Government Matriculation School, Sivakasi.

 You Nailed It Program

Comcast India Engineering Center

06/2025

Awarded for contributions towards setting up and configuring XMF-H meters in the lab.
